

May 8,2007

Ansome Computers Services has been my technological support for the past year and a half. Through this time, Ansome restructured our network to be much more efficient in meeting the needs of a health club with multiple users. Sean and Scott spent time evaluating our needs and the most cost effective way to meet these needs. During the transition period, Ansome supported my staff and their questions and concerns. Most recently, they have installed a wireless system for our members.

Ansome is very customer focused, routine preventive maintenance happens without having to call and make appointments. When we have been in need of service, never have I had an extended delay. In our business, this is very important.
